Design And Analysis Of Clinical Experiments
The novel opens with Aunt Polly scouring the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with ink, and prepares to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom's mischief and how she lets him get away with too much.

Tom comes home at supper time. Aunt Polly asks him about his adventures. During supper, Aunt Polly discovers that Tom has been skipping school that afternoon and went out with the boys. She orders him to clean the kitchen and demands that he wash his hands. Aunt Polly is satisfied.

Tom and the new arrival of his half-brother, Huckleberry Finn, are soon friends. Tom tells Huckleberry about the treasure he found in the cave and eventually chooses the newcomer as the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitenew the fence. Sam is passing by, and Tom tries to get him to do some of the whitewashing in return for a "trade alley," a kind of whistle. Sam almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his task.

My statistical knowledge and base continues to increase significantly now with each additional Statistics.com course taken. While I may not be using all the learnings directly in my day-to-day work (for example, regression modeling or calculating sample sizes), they are all influencing how I think about, approach, and work with data every day; the way in which I describe and present data and ...

Statistics.com - Course Calendar

1. Introduction. There is universal recognition that patient recruitment is a key determinant of success for clinical trials. A 2015 analysis of registered trials revealed that 19% were closed or terminated early because they could not accrue enough participants. Trials can also experience significant delays related to recruitment.

Clinical trials recruitment planning: A proposed framework ...

x Immunotherapy with combination of nivolumab and ipilimumab is the current standard of care therapy for patients with renal cell carcinoma (RCC). However, there are currently no data describing the efficacy of this combination in papillary renal cell carcinoma with sarcomatoid dedifferentiation, a rare but highly aggressive entity.

Clinical Genitourinary Cancer Home Page

Importance While guidance on statistical principles for clinical trials exists, there is an absence of guidance covering the required content of statistical analysis plans (SAPs) to support transparency and reproducibility.

Objective To develop recommendations for a minimum set of items that should be addressed in SAPs for clinical trials, developed with input from statisticians, previous ...
