Friendships In Childhood And Adolescence Guilford Series On Social And Emotional Development
The novel opens with Aunt Polly scrounging the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects on Tom's naughtiness and how she lets him get away with too much.

Tom comes home at supper and relays his adventures. During supper, Aunt Polly turns to Tom with a solemnity that tells him he will be skipped school that afternoon and will receive a severe beating. The door opens, and Tom's half-brother, Sid, enters. Tom's scheme to dodge a beating and eventually cross the river is revealed.

When he returns home that evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a "white alley," a kind of marble. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.

Friendships in Childhood and Adolescence

Friendship is a relationship of mutual affection between people. Friendship is a stronger form of interpersonal bond than an association. Friendship has been studied in academic fields such as communication, sociology, social psychology, anthropology, and philosophy. Various academic theories of friendship have been proposed, including social exchange theory, equity theory, relational exchange theory, and lifespan perspectives (Casas & Chavajay, 1999).

Friendships now become the testing grounds for new values and behaviors. Close friends help the adolescent work out his or her identity. In order to accept this identity formation, the adolescent must feel accepted and liked by others.

Early friendships profoundly affects child's development

Childhood is the age span ranging from birth to adolescence. According to Piaget's theory of cognitive development, childhood consists of two stages: preoperational stage and concrete operational stage. In developmental psychology, childhood is divided up into the developmental stages of toddlerhood (learning to walk), early childhood (play age), middle childhood (school age), and adolescence.

G. Stanley Hall (1844-1924), was the first psychologist to advance a psychology of adolescence in its own right and to use scientific methods to study them. He defined this period to begin at puberty at about 12 or 13 years, and end late, between 22 years to 25 years of age. Hall also described adolescence as a period of Sturm und Drang, "-- storm and stress."

Romantic relationships have much to teach adolescents about communication, emotion, empathy, identity, and (for some couples) sex. While these lessons can often provide a valuable foundation for long-term relationships in adulthood, they are also important contributors to growth, resilience, and happiness in the teen years.
