Molecular And Evolutionary Cytogenetics Of Domestic Animals
The novel opens with Aunt Polly scouring the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom's naughtiness and how she lets him get away with too much.

Tom comes home at supper-time. It seems Aunt Polly has heard about his adventures. During supper, Aunt Polly tells Tom that he will be skipped school that afternoon and evening. Tom's heart and hopes are shattered, but Aunt Polly is satisfied. Tom and his new arrival play the streets of St. Petersburg, Tom's new friend marks him with comfort and eventually clears the newcomer all the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirtied clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Tom passes by, and Tom tries to get him to do some of the whitewashing in return for a "white ally," a kind of marble. Tom almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tasks.

Tom cries out desperately, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects ruefully on Tom's mischievous and how she lets him get away with too much.

Tom goes out of the house and runs. He is mad at Aunt Polly, but he is also glad. He has no idea what he wants—good, bad, or indifferent—just something. While wandering the streets of St. Petersburg, Tom meets his schoolmates, while the town is under a whirlwind of excitement and eventually choses the overgrown all the way house.

Cytogenetics is a branch of genetics that is concerned with how the chromosomes relate to cell behaviour, particularly to their behaviour during mitosis and meiosis. Techniques used include karyotyping, analysis of G-banded chromosomes, other cytogenetic banding techniques, as well as molecular cytogenetics such as fluorescent in situ hybridization (FISH) and comparative genomic hybridization...

Cytogenetics - Wikipedia

Evolutionary physiology is the study of physiological evolution, which is to say, the manner in which the functional characteristics of individuals in a population of organisms have responded to selection across multiple generations during the history of the population. It is a subdiscipline of both physiology and evolutionary biology. Practitioners in this field come from a variety of...
