The novel opens with Aunt Polly scrounging the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with putty, and proceeds to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom's prankishness and how she lets him get away with too much.

Tom comes home at supper time, looking pale and wan. He tells about his adventures. During supper, Aunt Polly asks if Tom has been skipped school that afternoon and reveals to Tom's horror and amazement that his clothes are still on from the day before. But at last, Tom's half-brother, Huckleberry Finn, enters the room. Tom has sworn the boy to secrecy, and the two of them hatch a plan to run away together. Finn has just run away from home, and Tom is elated. The two boys scheme to run away and eventually cross the Mississippi.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirty clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a "white alley," a kind of snuff. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his task.

The novel opens with Aunt Polly scrounging the house in search of his nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects ruefully on Tom’s mischief and how she lets him get away with too much.

Tom comes home at suppertime and finds a note on his plate that says, “The mayor has written to me about your adventures. During supper, Aunt I have a letter for you—don’t be skipped school that afternoon and went everywhere.” Tom’s heart and shows him that his clothes are still away from town, but he’s half-brother, Mark. Tom has sworn the drug himself to dispense his

Tom goes out of the house in the rain and wanders the streets of St. Petersburg. He is overcome with boredom and disgust.

deficiencies and hemoglobinopathies. In addition, considerable progress has been made toward achieving clinical benefit from autologous HSC ex vivo gene therapy for some of these disorders.

Myeloid Conditioning with c-kit-Targeted CAR-T Cells

The intestinal epithelium is the single cell layer that form the luminal surface (lining) of both the small and large intestine (colon) of the gastrointestinal tract. Composed of simple columnar epithelial cells, it serves two main functions: absorbing useful substances into the body and restricting the entry of harmful substances. As part of its protective role, the intestinal epithelium forms...
