The 5 Minute Icu Consult The 5 Minute Consult Series
The novel opens with Aunt Polly scouring the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered in jam, and prepares to give him a whipping. Tom cries out theatrically, “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects bitterly on Tom’s mischief and how the boys get away with too much.

Tom comes home late and soppily reports that he missed school that afternoon and went instead to the river bank where Tom Bricks is playing cards and sharing his candy. Aunt Polly is satisfied.

Tom goes out of the house to look for Tom Bricks with the excuse of getting his slings and arrows. While wandering the streets of St. Petersburg, Tom meets Huckleberry Finn, the boy who in the previous year had been skipper of the Niantic. Tom and the new arrival establish a friendship, and eventually Tom comes all the way home.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirtied clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a “white alms,” a kind of marble. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his tabor.
The novel opens with Aunt Polly scrounging the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with jam, and prepares to give him a whipping. Tom cries out theatrically. “Look behind you!” and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects wistfully on Tom’s naughtiness and how she lets him get away with too much.

Tom comes home at suppertime. He has been out all day and has a lot to tell about his adventures. During supper, Aunt Polly asks Tom to promise that he will not be skipped school that afternoon and will remain good. Tom promises, but secretly, Tom’s half-brother Huck Merrick does not trust Tom and plans to guilt Tom into compensating him for damages.

Tom goes out of the house in search of Huck. He encounters a “white alley,” a kind of ringleader. Tom almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his thoughts.

Intra-aortic Balloon Pump Refresher FAQ. What is an intra-aortic balloon pump? An intra-aortic balloon pump is a device that basically does two good things for a heart in trouble. These two effects correspond to the two movements that the balloon makes, namely: inflation and deflation.

Intra-Aortic Balloon Pump Refresher - Notes on ICU Nursing

This video shows the mechanism for dislodgement and deformation of humeral intraosseous needles and how to avoid this. In summary, if you need to abduct the arm (eg. for thoracostomy), keep the thumbs down (ie. have the arm internally rotated at the shoulder). Otherwise the IO catheter may bend or ...

The digestive tract is designed to tolerate acid but we eat so many acid causing "catalyst" meals daily, that instead of enzyme digestion 90% of the time (as Mike thinks it should be), we digest almost all meals with hydrochloric acid.

Some twelve years ago I was rushed to hospital with agonising diverticulitis, having never suffered symptoms previously. Seven days on water, plus anti-biotics seemed to fix the problem.

Antibiotics don't work for diverticulitis, so what does ...

Hypophosphatemia is an electrolyte disorder in which there is a low level of phosphate in the blood. Symptoms may include weakness, trouble breathing, and loss of appetite. Complications may include seizures, coma, rhabdomyolysis, or softening of the bones. Causes include alcoholism, refeeding in those with malnutrition, diabetic ketoacidosis, burns, hyperventilation, and certain medications.

Hypophosphatemia - Wikipedia

Top News. Cardinal Health makes a $10 million investment in home medical monitoring technology and monitoring services vendor Medically Home Group. The company says that its remotely monitored "virtual hospital room" that it sets up in the patient's home saves the 60% of the expense of hospitalization that is related to fixed costs, such as buildings.

INTRODUCTION — Sepsis is a clinical syndrome characterized by systemic inflammation due to infection. There is a continuum of severity ranging from sepsis to septic shock. Although wide-ranging and dependent upon the population studied, mortality has been estimated to be ≥10 percent and ≥40 percent when shock is present. In this topic review, the management of sepsis and septic shock will be discussed.
