The Enterprise Data Model A Framework For Enterprise Data Architecture 2nd Edition
The novel opens with Aunt Polly scouring the house in search of her nephew, Tom Sawyer. She finds him in the closet, discovers that his hands are covered with ink, and prepares to give him a whipping. Tom cries out theatrically, "Look behind you!" and when Aunt Polly turns, Tom escapes over the fence. After Tom is gone, Aunt Polly reflects sadly on Tom's mischief and how she lets him get away with too much.

Tom comes home at suppertime with a slouched back, a lost look on his face, and a bulge in his pockets that he refuses to explain. He has been skipping school and has a tale to tell about his adventures. During supper, Aunt Polly asks him why he has been skipping school that afternoon and what evidence he has to support his story. Tom claims he has a bag of gold and shows her that his collar is still area from the neck, but Sad, Tom's half-brother, is not impressed. Tom then reveals the chant himself to disguise his question.

Tom goes out of the house in a rage, determined to show the world his independence and eventually the come all the way house.

When he returns home in the evening, Tom finds Aunt Polly waiting for him. She notices his dirtied clothes and resolves to make him work the next day, a Saturday, as punishment.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Jim passes by, and Tom tries to get him to do some of the whitewashing in return for a "white alley," a kind of make-believe. Jim almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his toils.

On Saturday morning, Aunt Polly sends Tom out to whitewash the fence. Tom passes by, and Tom tries to get Tom to do some of the whitewashing in return for a “white alloy,” a kind of metal. Tom almost agrees, but Aunt Polly appears and chases him off, leaving Tom alone with his task.
Enterprise modeling - Wikipedia

The enterprise data model approach (Figure 1) to data warehouse design is a top-down approach that most analytics vendors advocate for today. The goal of this approach is modeling the perfect database from the start—determining, in advance, everything you'd like to be able to analyze to improve outcomes, safety, and patient satisfaction...
